

ISIS - Innovative Solutions In Space BV is an ambitious and dynamic space company located in Delft, The Netherlands. As one of the CubeSat global market leaders, ISIS develops and sells advanced space systems and nanosatellites, provides worldwide launch services and satellite operations. Currently, ISIS employs over 90 space enthusiasts. To strengthen our multidisciplinary team we are hiring a:

Quality Control Engineer (Full Time)

In the fast growing nanosatellite market, ISIS offers a broad portfolio of miniaturized components and subsystems that are both used in ISIS designed satellites and sold as standalone products to customers globally.

As a Quality Control Engineer you are part of the PA/QA team within ISIS. You will provide services to the standard product line and projects. You handle the incoming and outgoing inspections of materials, parts and products before they are released to storage, production, internal projects and customers. You check if certificates, procedures and test reports are in accordance with the requirements and report to the PA/QA team, production coordinator and project manager. You ensure and monitor that the ISIS Quality Management System is actively implemented during the production phase.

Your main responsibilities:

- Incoming Inspection on parts and materials both mechanical and electrical
- Outgoing inspection on products both mechanical and electrical
- Provide input to the Non Conformance Management process
- Assist during the preparation of project and product reviews such as SRR, PDR, CDR, TRR/TRB
- Provide input during the preparation phase of internal and external audits

Prerequisites:

- Beng in Engineering (mechanical and/or electrical) or proven level through experience
- Energetic team player with a positive mindset and excellent communication skills
- Familiar with IPC standard
- Familiar with ECSS standard
- Attention to detail, accurate, punctual, analytical, problem solving are part of your skill set
- Proficient in English (speaking / reading / writing)

So, if you are ambitious, want to work in a challenging and inspiring environment, and consider this position to match your professional experience and background as well as your personal interests do not longer hesitate and send your CV and motivation letter via e-mail to: recruitment@isispace.nl or check our website <https://www.isispace.nl/careers/>
