

ISIS - Innovative Solutions In Space BV is an ambitious and dynamic space company located in Delft, The Netherlands. As one of the CubeSat global market leaders, ISIS develops and sells advanced space systems and nanosatellites, provides worldwide launch services and satellite operations supporting a broad range of small satellite applications. Currently, ISIS employs over 110 space enthusiasts. To strengthen our multidisciplinary team in Delft we are hiring a:

PCB Assembly Technician (fulltime)

to join our Assembly Integration and Verification team. As a PCB Assembly Technician, you will be responsible for soldering the ISIS standard sub-systems. You will need some experience in manually soldering SMD- and Through-hole components on PCB's. Furthermore, experience in shrinking wiring (AWG 22, 24 and 26) to several kinds of connectors is required. The soldering takes places according to the IPC-J-STD-001F requirements and will have to meet the highest class 3.

Your main responsibilities:

- Soldering ISIS standard products
- Signing off on production instructions

Prerequisites:

- At least 2 years of hands-on experience in a comparable technical environment
- Proficient in English (at least Level B in speaking / reading / writing)
- Experience in small scale production
- Experience with Microsoft Office (Word/Excel)
- Experience with soldering according to the IPC-J-STD-001F requirements (preferably certified)

Preferred:

- Affinity with space
- Energetic team player with a positive and proactive mindset
- Good communication skills
- Comfortable in a multidisciplinary and dynamic atmosphere
- 'Get it done' mentality
- Continuous improvement

So, if you are ambitious, want to work in a challenging environment, and consider this position to match your professional experience and background as well as your personal interests, do not hesitate and send your CV and motivation letter via e-mail to: recruitment@isispace.nl no later than the 12th of November 2019.
